2 8 0 Consolidation Steam

Under the Whyte notation for the classification of steam locomotives, 2-8-0 represents the wheel arrangement of two leading wheels on one axle, usually in a leading truck, eight powered and coupled driving wheels on four axles, and no trailing wheels. In the United States and elsewhere, this wheel arrangement is commonly known as a Consolidation, after the Lehigh and Mahanoy Railroad's Consolidation, the name of the first 2-8-0. The Consolidation represented a notable

advance in locomotive ...

2-8-0 - Wikipedia

2-8-0 Consolidation. The Consolidation Type was a highly successful steam locomotive design of the latter half of the 19th century that would eventually replace the 4-4-0 American Type. The new Consolidation, a 2-8-0 design, allowed for more tractive effort with two additional driving axles and a larger boiler.
