preparing International Standards is normally carried out through ISO technical committees.

ISO 3779:2009(en), Road vehicles ? Vehicle identification ...

A vehicle identification number (VIN) is a unique code, including a serial number, used by the automotive industry to identify individual motor vehicles, towed vehicles, motorcycles, scooters and mopeds, as defined in ISO 3779 (content and structure) and ISO 4030 (location and attachment). VINs were first used in 1954 in the United States.

Vehicle identification number - Wikipedia

- It is based on the ISO Standards 3779 and 3780. The former describes the composition of the VIN and the latter describes the codification system which identifies the manufacturer, the World Manufacturer Identifier (WMI).
- The WMI is managed by the Society of Automotive Engineers (SAE) based in the US.

Vehicle Identification Number VIN - UNECE
