The definition of
natural disasters is any
catastrophic event that
is caused by nature or
the natural processes
of the earth. The
severity of a disaster is

Natural Hazards

Earth's Processes

61) In the past, many people believed that natural hazards were random events that took place on the Earth's surface. Explain why this is not true and how scientists know where hazards might occur. Explain how thinking of hazards scientifically will help communities and average people cope with the disaster.
