Troubleshooting problem reports is core network maintenance function. While troubleshooting methodologies are described in detail later in this guide, troubleshooting is simplified by a structured network maintenance approach, which includes documentation, backups, and some form of proactive monitoring system.

Network Maintenance Tasks

Structured means you have a pre-defined plan for network maintenance that will make sure that problems are solved before they occur. As a network engineer this will also make your life a whole lot easier. Interrupt-driven means you just wait for trouble to occur and then fix it as fast as you can. Interrupt-driven is more like the "fireman" approach...you wait for trouble to happen and then you try to fix the problem as fast as you can.
