Online Library New General Mathematics For

In mathematics the words “power” and “index” are used interchangeably i.e. they are synonymous, they mean the same thing. 13^2 is read as 13 squared or 13 raised to power of 2, or 13 index 2. In 13^2 , 2 is an index number, it is an index notation for 169. Since $13^2 = 13 \times 13 = 169$, then the index form of the number 169 is 13^2 .

If you check New General Mathematics for JSS 2, you will know that almost all the topics to which those questions given by the OP are been treated in that book. A smart JSS 2 student will do excellently well in that exam, don't look at the class required to answer the questions but look at the questions.
